Designed to serve the executive leadership level, our Advisory & Consulting program includes a dedicated, integrated or selected portfolio of services for decision-makers for businesses, boards, development teams, executives, government agencies and NGOs by analyzing and understanding the problem and the atmospherics and advising on optimal solutions and implementation.

Our advisory team, backed by a dedicated consulting team, prepare, advise and execute organizational, operational and structural plans and strategies, guiding the organization or the process to optimized performance, market position, business transformation or geographical and industry subject-matter level excellence.

Advisory & Consulting

Boards & Executives Advisory
Board and executive level services provided by a team of corporate, industry, market and intelligence experts focusing on perspectives, developments, geopolitical and market trends and solutions, as well as direct support of the decision-making process.

Business Transformation & Optimization
Business and organizational focused services based on a practical and realistic approach for the transformation and optimization of the corporate structure, operational process, market approach and management of the competitive factors, with an actionable set of execution plans.

Market Entry, Representation & Operational Support
Designed for international businesses with expansion plans, as well as newly-established businesses, with direct market intelligence, analysis, representation and implementation of all phases of the market entry for the clients, including on-ground operational, HR, administrative and supply chain support.

Project & Program Management
Dedicated in-country and industry-related expert team with background and experience in planning, kickoff and management of projects and programs in the private and public sector, including project workforce outsourcing, selection and support.

Government Contracting, Support & Implementation
Full-cycle integrated service to businesses and organizations that do not have in-house capability to engage the government sector with an optimized and successful approach, supported by a team with experience in both government and industry contracting and contract execution support.

Executives & Subject-Matter Experts Sourcing
Solutions for private and public organizations that are looking for validated, vetted and effective top-level managers, executives or industry experts to join their organizations or simply to outsource them for a pre-defined period or task timeline.

Our Methodology

Our methodology is based on realistic assessment, analysis and awareness of the question at hand, combined with practical and real-world implementation. We do not offer hypothetical or theoretical advisory and consulting. We integrate the theory in actionable solutions that our clients can execute with or without our help, and see the results in practice.

Based on the requirement of our clients, we also engage industry subject-experts who assist our in-house teams to provide industry-centric support and increase the value and the impact of the advisory and consulting services.

Our primary guiding principle is the optimization of resources and realistic solutions. We don't just provide report and strategy, we put our teams as embedded resources to the clients in order to implement the proposed solutions within the existing conditions and capacity of the clients, avoiding costs or downtime.

The Advantages

Scalable Intelligence Reporting

Clients can customize pre-planned packages by choosing the combination of predefined services or request customized tasking.

Predictable and Fixed Pricing

The clients can predict the budget based on a pre-determined price range and plan the type of report, duration and depth of intelligence.

Short Proposal & Response Time

24/7 on-duty managers address all inquiries in regards to task order pre-emptive analysis, scoping, proposals and confirmation.

Reduced Delivery Period

Centric-based approach that combines analysis and field operations at the same time, increasing the coverage time and response to urgent incidents.

Embedded Resources

Dedicated team of corporate, organizational and market analysts and subject-matter experts added to the structure of the clients to act as their own resources and capacity.

Human-Controlled Process

Fully human-based process that provides initiative, experience and responsiveness to each specific situation or challenge.

Volume Discount Program

Discount program for clients that use combination of other services either as stand-alone or a combined scope of work.

Other Services Integration

Clients can combine other services as full coverage scope for their business advisory and consulting requirements.

Follow-up Availability

The dedicated team continues to be available for follow-up questions within the scope of work and customization of the services for extended period coverage.

Feedback Implementation

No one is perfect, and we are happy to hear about it. The feedback helps us understand the expectations and we implement it in the next project.

Confidentiality

Our clients are protected by strict confidentiality and NDA policies that will safeguard their operations, process and critical information.
