We investigate, analyse and support the campaigns, board dynamics and strategies for activist investors or companies that are targets to unethical activism through intelligence, research, analysis and real-time situational awareness in order to provide our clients with actionable information and opinion on best approach to both decision-making and execution of their strategies, proxy conflicts, public and board shareholders proposals and track and analyse the impact of the active or protective implemented plans and behaviour in order to prepare the clients for timely response and engagement.

Shareholder Activism Intelligence

Activist Monitoring, Identification & Profiling
Combined, multi-source package of intelligence collection, monitoring, analysis and real-time reporting for potential activist investors engagement, strategies, proxy networks and conflicts and predictive profiling with scenario-based analysis of the development of the activist campaigns and actions.

Reputation, Red Flags & Negative Impact Investigations
Focused and centric intelligence collection and analyses for the activism parties in order to support their activist or defensive strategies by arming the clients with knowledge, insights, predictions and proprietary information that provides an advantage in the end-stage of the activist process.

Fiduciary & Conflict of Interest Analysis
Specialized package designed to address any hidden or misinformed information, background facts, or fiduciary noncompliance and conflict of interest behavior by decision-makers, shareholders, or other parties involved in any of the sides of the activist process.

Market Opinion Analysis
Intelligence and predictive analytics service designed to provide focused research, collection, mapping and impact analysis of the effects from the activism strategy and implementation, activism profiles, patterns and reputational analysis of the businesses from a market perspective.

Behavioral Profiling & Analysis
Customized intelligence collection and analysis of the information in order to design, test and confirm profiles of corporate and personal behavior by businesses and executives in order to predict the expected strategies and plans towards resolution of proxy conflicts.

Regulatory, ESG & Legal Impact Analysis
Research and analysis of the overall regulatory, ESG, legal and exposure profiles of activism targets in order to identify key aspects and information that will contribute to activist campaigns planning, engagement and disclosure transparency in the activism process.

Our Methodology

We implement non-invasive, discreet, and legally authorized collection through various open and human sources, databases, media and social networks, 24/7 monitoring of relevant information of interest in order to respond to each specific requirement from our clients. All information is crosschecked through several pre-defined reference sources and filters of reliability and relevance, as well as impact analysis.

Based on the requirements of our clients, we also engage industry subject-experts who assist our in-house intelligence and analysis teams to provide industry-centric input and increase the value and impact of our services.

The Advantages

Scalable Intelligence Reporting

Clients can customize the services as stand-alone or combined multiple tasks, as well as context coverage with standard or specific questions of interest.

Predictable and Fixed Pricing

The clients can predict the budget based on a pre-determined price range and plan the type of report, quantity of orders and depth of intelligence.

Short Proposal & Response Time

24/7 on-duty project managers address all inquiries in regards to task order pre-emptive analysis, scoping, proposals and confirmation.

Reduced Delivery Period

Centric-based approach that combines the collection, analysis, and report preparation, reducing the delivery period to less than 5 days.

Flexible Reporting Format

White-labelled or branded reporting format based on the clients' templates or the Dynamics International Group standard report format.

Human-Controlled Process

Fully human-based project preparation, collection, and post-collection analysis for relevance, reliability, and impact of the provided intelligence.

Volume Discount Program

Discount program with deduced unit price per report for larger and regular monthly volume orders.

Other Services Integration

Clients can combine the activism intelligence with other services for an optimized, full coverage package and reduced costs.

Follow-up Availability

The project and analysis team continues to be available for follow-up questions within the scope of work and customization of the report's final version.

Feedback Implementation

No one is perfect, and we are happy to hear about it. The feedback helps us understand the expectations and we implement it in the next project.

Secure Delivery System

Our clients can choose their own method of transfer of the reports, or request access to our Intelligence Box platform for secure file exchange.
